

SmartMeshApp Introduction to Offline Communications Functionality

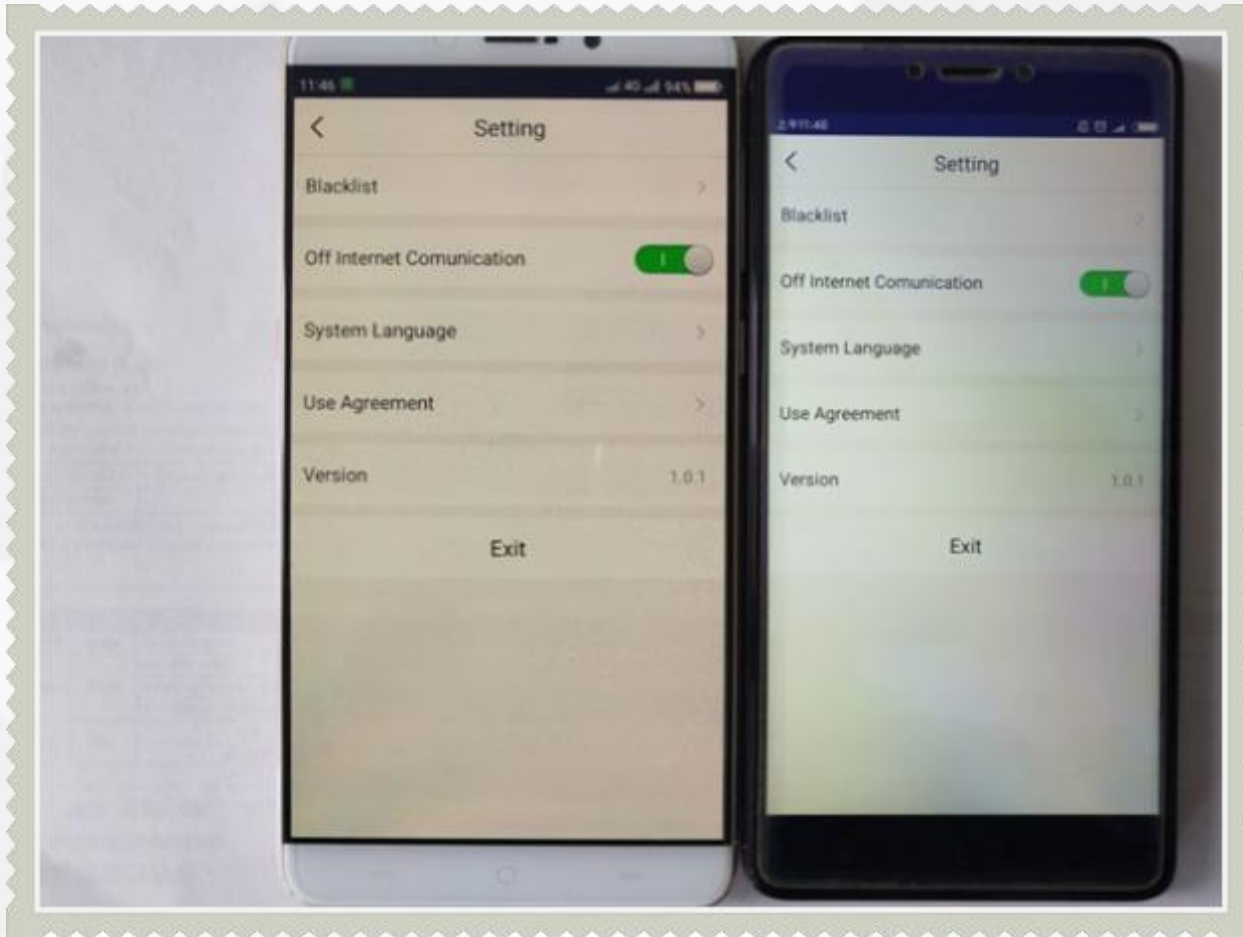

Step_1 : Open WLAN services without needing access to the internet

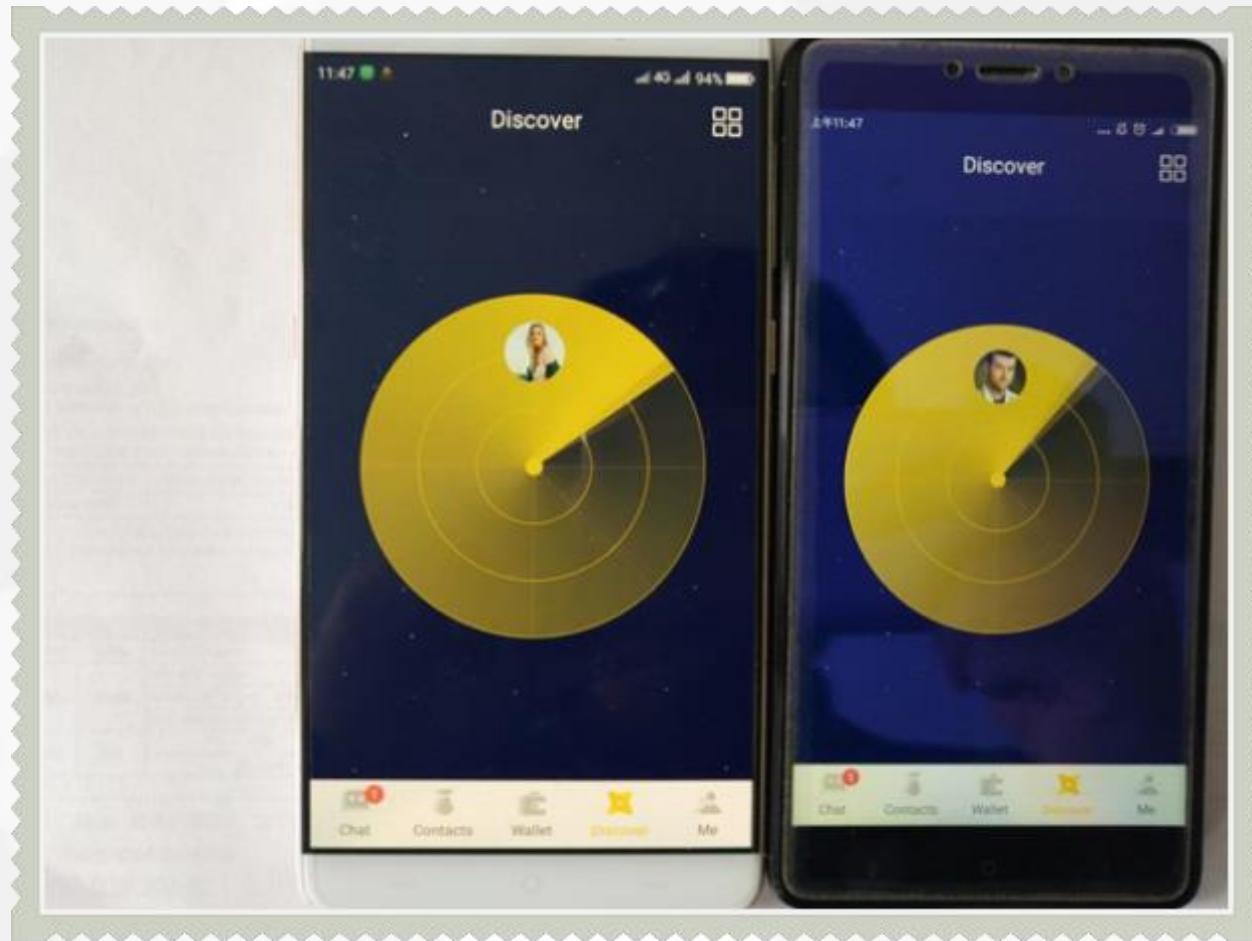

■ Step_2 : Open the "Me" tab at the bottom of the SmartMesh UI

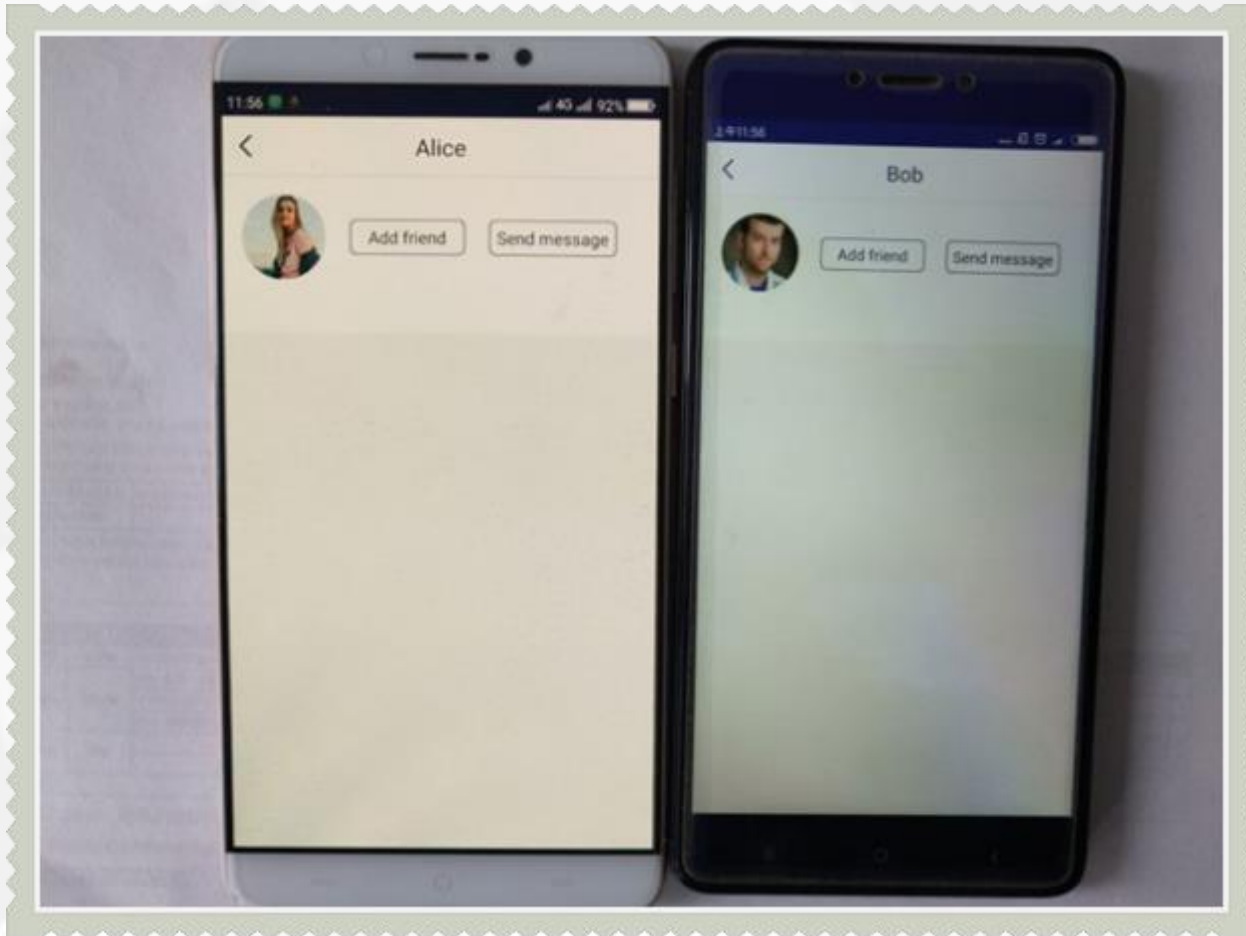

- Step_3 : Open the "Setting" tab and turn on the "Off Internet Communication" switch so that it turns green

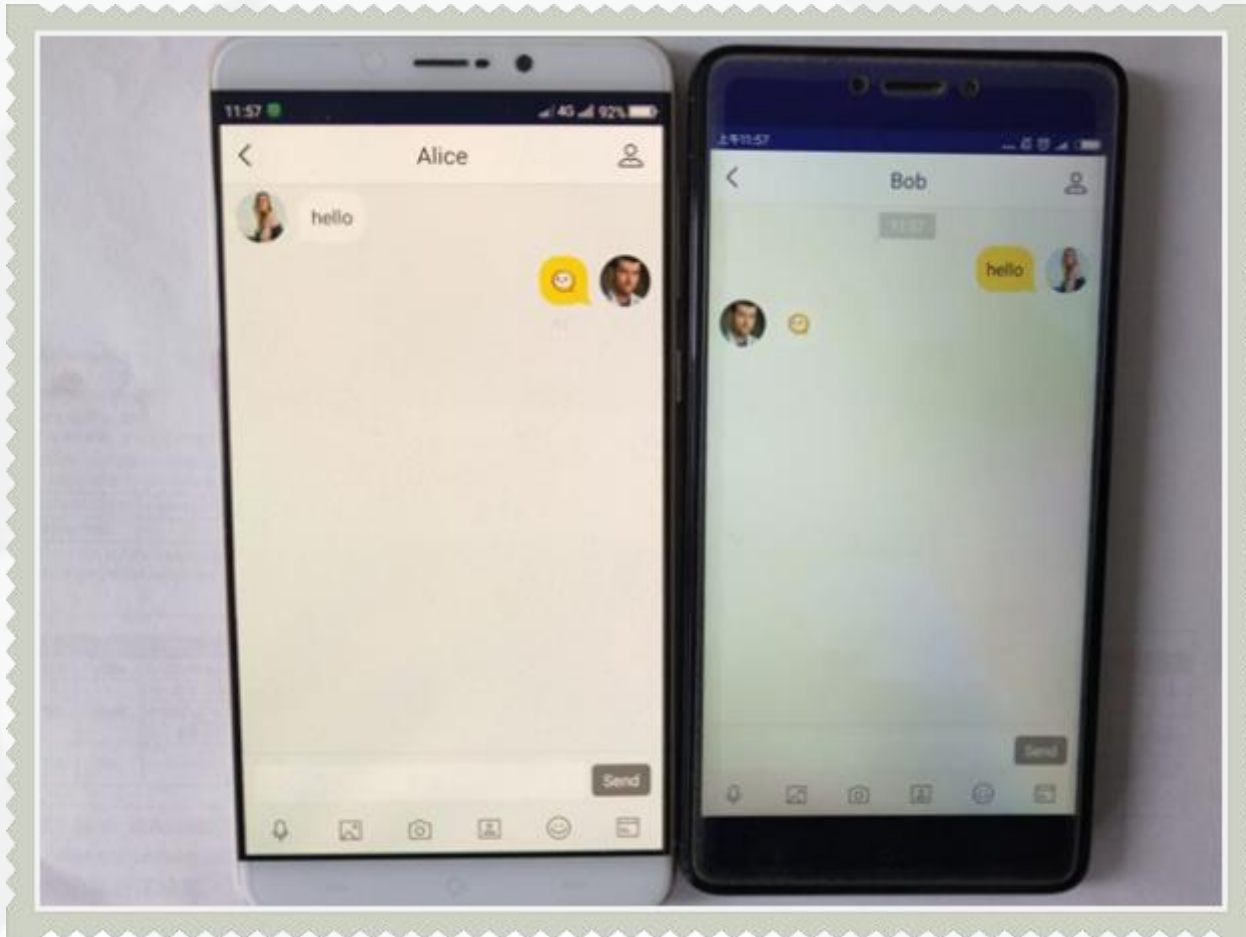

Step_4 : Go back and open the "Discover" tab found at the bottom of the screen

■ Step_5 : Find the profile picture of someone within range on the radar, select them, and hit "Send Message".

- Step_6 : Now you can chat all you want!
(Most effective within a 100m range of each other)

END
